

GasPro - ETTRM Gas Solution

Complete and Proven

For over 16 years, GasPro systems have been successfully implemented on time and within budget. Data Management Solutions (DMS) is proud of their 100% successful implementation record that they have been able to maintain, and is one of the few, if not the only, solution provider that can make this claim.

The GasPro implementation process is quick, easy and takes approximately 150 days. DMS is ready, willing, and able to provide as much assistance as needed to ensure success.

Compliance Made Easy

The team at DMS understands the importance of client data integrity and its ultimate use in providing the assurance needed to fulfill compliance. GasPro is designed on Generally Accepted Accounting Principles (GAAP) and its architecture is specifically designed to facilitate the ever changing FERC, FAS, and Sarbanes Oxley requirements with ease.

True Value

All GasPro clients report tremendous benefits and cost savings from the reductions in time, effort, and resources required to more efficiently operate their business. This allows them time to focus their efforts on true value-added activities. They also report increased accuracy in the Front-to-Back Office transaction process. All our clients report increased accuracy, in fact many have stated increases from an average of 65 percent before GasPro, to well over 95 percent after the implementation.

Most importantly, within the first few years clients have recouped their investment in GasPro through process efficiencies, reduction/elimination in penalties, and their ability to effectively manage increased business opportunities.

Stellar Support

GasPro users are assured that when help is needed, we are only a few minutes from responding with our 24/7/365 expert assistance. We know our industry, our clients, and our product.
